SCDT

Anatoli A. Tziola, Postdoctoral Researcher, Cyprus University of Technology

SCDT Scope and Features

CIRCULOOS

Funded by the European Union

Simulation & visualization of intra-factory logistics and supply chain arrangement

Progress status of resources, processes, products, waste, buffer zones, emissions, energy consumption

Interaction in the supply chain between factories, suppliers, consumers

Testing of circular intra-factory and supply chain arrangements

This project has received funding from the European Union's "Horizon Europe" programme under grant agreement 101092295

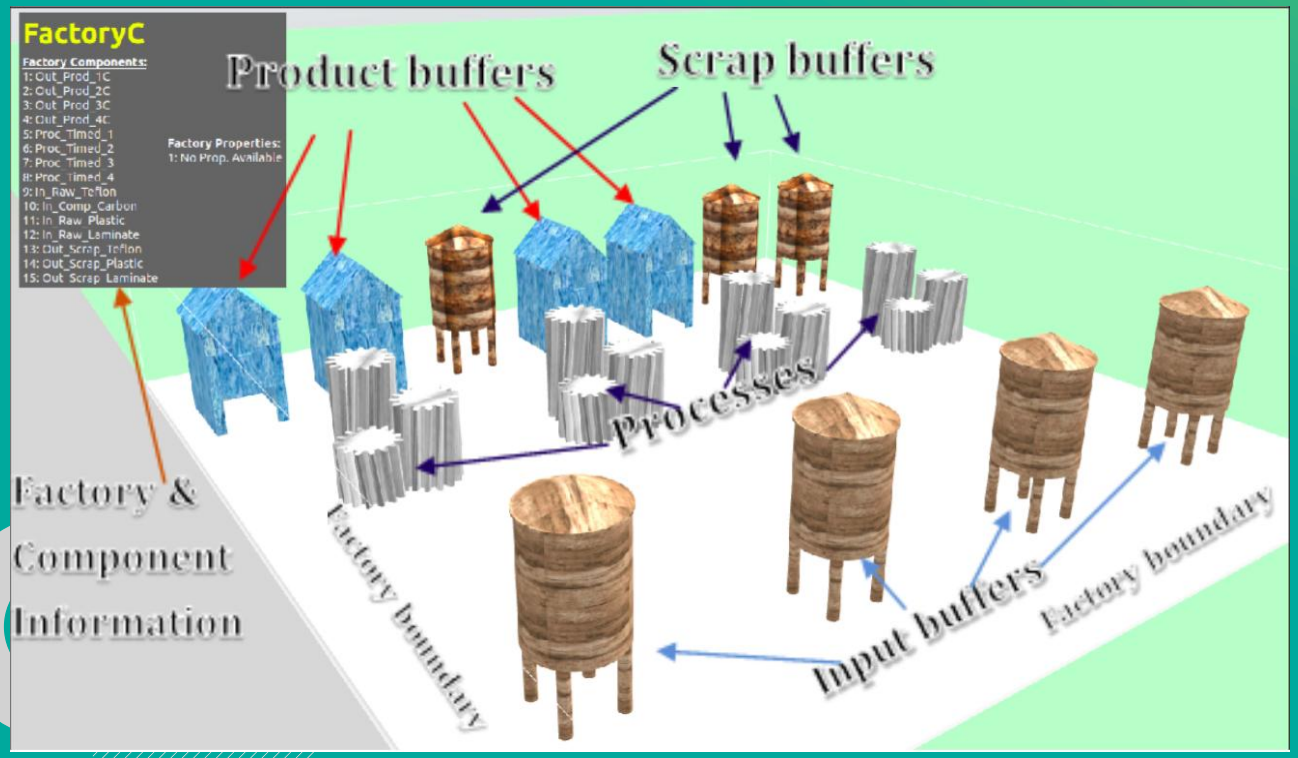

SCDT

Factory and Supply Chain representation

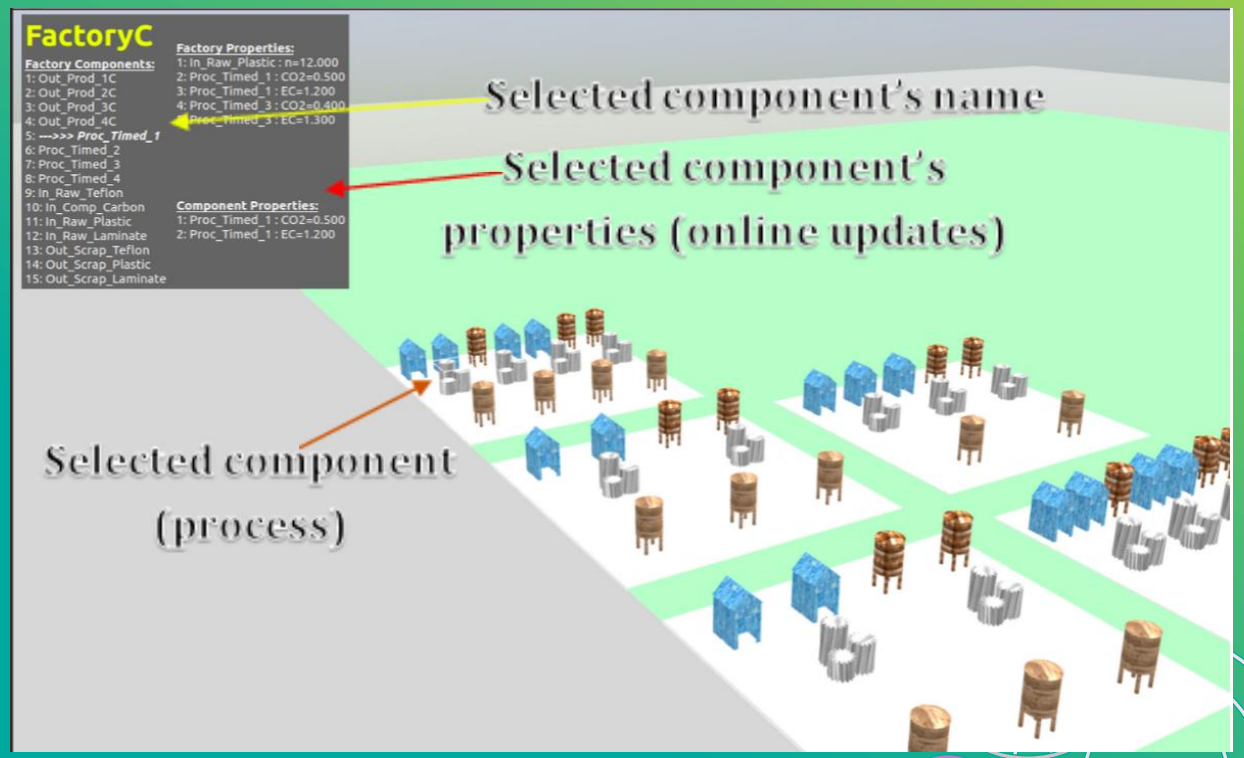

CIRCULOOS

Funded by the European Union

Intra-factory operations

Supply chain representation of interaction between the actors of the supply chain

This project has received funding from the European Union's "Horizon Europe" programme under grant agreement 101092295
